

**Continuum Overnight Primary Care** extends your practice's relationships beyond business hours. Our goal isn't to "cover nights"—it's to **extend your hours** into the night and early morning. Your patients receive the same thoughtful, longitudinal, evidence-based care that they trust from your team during the day, and your team gets a well deserved break at night.

## A better after-hours solution, built on a proven model

### More Than Triage

Many nighttime concerns aren't emergencies—they're questions, follow-ups, chronic symptoms, medication decisions, and anxiety that peaks after work. Our team moves care forward in line with your daytime standards.

### Less Overnight Call

Your clinicians don't need to be on call at night. With continuity that extends into the evening and early morning, your day teams will arrive to structured plans, completed refills, routed labs, and calmer inboxes.

### Patient Satisfaction

Patients stay in your ecosystem. Overnight care builds trust, reinforces your care plans, and supports the long arc of health instead of redirecting patients to episodic, disconnected care after hours.

## Not "urgent care after hours," but a true continuation of daytime care

- 1 Unlimited text-based care at night
- 2 Live video visits when appropriate
- 3 Same-night appointments
- 4 Results interpretation & plan modification
- 5 Preventive care & counseling
- 6 Chronic & acute disease management
- 7 Electronic medication prescribing
- 8 Labs ordered through national partners
- 9 Warm handoff to your clinician team

Continuum Overnight Primary Care isn't night coverage. **It's your practice, uninterrupted.**
